# Bio Security for Poultry Gatherings Participants

## Specific biosecurity advice for participants

Participants must familiarise themselves with the symptoms of Avian Influenza, Newcastle Disease and other notifiable diseases and should take all reasonable steps to minimise the risk of spread of such diseases through adopting pro-active biosecurity measures including, but not limited to:

- Minimise the movement of birds between enclosures, and between sites
- Ensure clean footwear before and after visits, and between sites
- Take steps to deter wild birds, particularly waterfowl
- Feed and water birds under cover and remove any spillages
- Execute an effective programme of vermin control
- Maintain good cleanliness and hygiene, regularly disinfect hard areas
- Secure poultry enclosures with appropriate fencing to deter wild birds
- Use of disinfectant mats or foot dips between buildings

### **Before you leave your premises to attend a poultry gathering**

- If your premises are within an area of the UK which is under restrictions relating to notifiable avian disease (including Protection and Surveillance Zones), you are not permitted to attend gatherings.
- All participants must inspect the health of all birds at the place of origin before departure. Do not move birds if there are any signs, or suspicion of any disease.
- All participants must prepare clean solid-bottom and sided carriers to transport birds.
- All participants must use clean bedding material at the start of the journey, on the date of departure, which must be contained within the carrier at all times.

**Further details will be included with entry passes, as well as declaration forms.**
